

# Hands-on Activity 13.2 Data Storytelling using Tableau Online

INTRODUCTION	DATA VISUALIZATION	DATA VISUALIZATION
--------------	--------------------	--------------------

This dataset, released by the Department of Health (DOH) via their Google Sheets data drop, contains comprehensive information on the COVID-19 outbreak in the Philippines. The data encompasses various aspects of the pandemic, including case numbers, recoveries, and fatalities across different regions. Researchers and analysts can utilize this dataset to track the progression of the virus, identify hotspots, and evaluate the effectiveness of public health interventions. By providing open access to this information, the DOH aims to promote transparency and support data-driven decision-making in managing the health crisis.
